Computer Science 1, Final Exam 2017-2018

TRUE/FALSE

1. int, char, float, double, and boolean are all "simple" data types.

Answer: T
Points: 1/1

2. A data structure is a data type whose components are smaller data structures and/or simple data types.

ID: 020022

Answer: T **Points:** 1 / 1

3. An array is a data structure with one of more elements of the same or different data types.

Answer: F
Points: 1/1

4. A char variable can be used like an small int.

Answer: T **Points:** 1 / 1

5. The primary difference between float and double is in the magnitude of the values they can hold.

Answer: T
Points: 1/1

6. The % is called the modulus operator.

Answer: T **Points:** 1 / 1

7. The relational or logical expression will result in a bool value.

Answer: T **Points:** 1/1

8. x=10/y*(127/x); is the same as x = 10 / y * (127/x);

Answer: T **Points:** 1 / 1

Answer:

Points:

В

1/1

MULTIPLE CHOICE

Media de choice					
<u>В</u>	9.	Computer users today expect to use a		user interface.	
		a. touch-screen	c.	command-line	
		b. graphical	d.	on-line	
		Answer: B Points: 1/1			
A 10. GUI programs read from the user and b			d behave accordingly.		
		a. events	c.	command-line	
		b. orders	d.	files	
_		Answer: A Points: 1/1			
O D	11.	What is HTML?			
		a. Happy Turtles Moving Lazily	c.	Hyper Terminal Language	
		b. Hyper thermal Marking Language	d.	Hypertext Markup Language	
		Answer: D Points: 1/1			
<u> C</u>	C 12. The Swing class used to produce Java applications is				
		a. JApplet	c.	JFrame	
		b. JApplication	d.	JJavaApplication	
		Answer: C Points: 1/1			
<u>В</u>	13.	The "container class" that is often used to hold other components.			
		a. JApplet	c.	JButton	
		b. JPanel	d.	paint	

A 14. The screen of a computer is a grid of little squares called ______

a. pixels

c. squares

b. graphics

d. dots

Answer: A
Points: 1/1

A 15. Java colors are typically created by combining what 3 values.

a. red, green, and blue

c. blue, red, and purple

b. yellow, blue, and green

d. cyan, magenta, yellow

Answer: A
Points: 1/1

16. A ______ object exists to display a line of text that cannot be edited by the user.

a. JButton

c. JTextfield

b. JTextarea

d. JLabel

Answer: D **Points:** 1/1

17. What is the output of the code segment at right?

String[] list = new String[3];
list[1] = "A";
list[2] = "B";
for (int i = 0; i < list.length; i++)
 out.print(list[i] + " ");</pre>

a. 0 A B

c. null A B

b. AB

d. ArrayOutOfBoundsException

18. Which of the following statements, if added to the code segment below, would output the length of a?

```
char a[] = {'a','b','c','d','e'};
String s = "";
for (int i = 0; i < 5; i++)
        s += a[i];
System.out.println(s.substring(0,3));</pre>
```

a. out.print(a.length);

c. out.print(a.size());

b. out.print(a.length());

d. more than one of the above

Answer: A
Points: 1/1

19. Which of the following will print the number of

elements in an array a?

- a. System.out.print(a.size());
- c. System.out.print(a.length());
- b. System.out.print(a.length);

Answer: B **Points:** 1/1

20. What is the output of the code segment at right?

d. 4321e. 432

- 21. Data structures are defined by
 - a. the data types they store only.
 - b. the manner of data accesses only.
 - c. both the data storage and the data access.
 - d. the storage of primitive data types.

Answer: C
Points: 1/1

22. Consider the program segment below.

double grades[]; grades = new double[50];

What is the index range capable of accessing an element of the **grades** array?

a. 0..49

c. 0..50

b. 1..49

d. 1..50

<u> E</u>

Points:

1/1

23. What is the output of program **Java1215.java** below?

```
public class Java1215
       public static void main(String args[ ])
         int list[] = \{1,2,3,4,5\};
         for (int k = 1; k \le 5; k++)
          System.out.println("list[" + k + "] = " + list[k]);
       }
      }
a. list[0] = 0
   list[1] = 1
   list[2] = 2
   list[3] = 3
   list[4] = 4
b. list[0] = 1
   list[1] = 2
   list[2] = 3
   list[3] = 4
   list[4] = 5
c. list[1] = 1
   list[2] = 2
   list[3] = 3
   list[4] = 4
   list[5] = 5
d. list[1] = 2
   list[2] = 3
   list[3] = 4
   list[4] = 5
e. Compile Error
Answer:
         Ε
```

24. What is the FIRST and LAST output from this program segment?

```
int IntNum[] = new int[100];
int J;
for (J=1; J<=100; J++)
    IntNum[J] = J;
for (J=1; J<=100; J++)
    System.out.println(IntNum[J]);</pre>
```

- a. 0 and 100
- b. 0 and 99
- c. 1 and 100
- d. 1 and 99
- e. Array Index Out Of Bounds Error

25. Use this program segment to answer the question.

What is the output of the fourth **println**?

- a. true
- b. false
- c. 14
- d. 15

Points:

1/1

e. Array Index Out Of Bounds Error

Answer: E
Points: 1/1

26. Which of the following statement correctly displays all the **list** elements?

```
int list[ ] = {11,22,33,44,55,66,77,88,99};
```

27. Rewrite the old **for** loop program segment below with the new **for** loop.

```
int list[] = \{1,2,3,4,5,6\};
    for (int k = 0; k < list.length; k++)
           System.out.println(list[k]);
for (int number: list)
        System.out.print(number + " ");
for (int number: list.length)
        System.out.print(number + " ");
for (int k = 0; number: list)
        System.out.print(number[k]);
This program segment cannot be converted to the new for loop.
```

Answer: Α **Points:** 1/1

28. The Arrays class

- a. makes it possible to display individual array elements using the new Java 5.0 loop.
- b. makes it possible to display individual array elements with any type of loop control structure.
- c. makes it possible to display individual array elements without using any type of control structure.
- does not make it possible to display individual array elements.

 \mathbf{C} Answer: **Points:** 1/1

29. What is the output of the program below?

import java.util.Arrays;

```
public class Demo
              public static void main(String args[])
                      int list[] = \{11,22,33,44,55\};
                      System.out.println(Arrays.toString(list));
              }
a. {11,22,33,44,55}
```

b. [11, 22, 33, 44, 55]

c. 11, 22, 33, 44, 55

d. There is no output without a loop structure.

В **Answer: Points:** 1/1

30. Which import statement eliminates the need to use the **System** class identifier in a program statement?

a. import java.lang;

- c. import static java.lang.System.*;
- b. import java.lang.System.*;
- d. import System.out.*;

Answer: C **Points:** 1/1

- 31. An array is a
 - a. data structure with one, or more, elements of the same type.
 - b. data structure with LIFO access.
 - c. data structure, which allows transfer between internal and external storage.
 - d. data structure with one, or more, elements, called fields, of the same or different data types.

Answer: A Points: 1/1

- 32. What is known by the declaration ArrayList list = new ArrayList(); ?
 - a. list is an ArrayList object.
 - b. Elements of the **list** array are objects.
 - c. The type of objects stored by **list** are unknown.
 - d. All of the above

Answer: D **Points:** 1/1

- 33. A ______ is a linear collection that allows access to any element. Duplicates may exist.
 - a. collection

c. set

b. list

d. museum

Answer: B
Points: 1/1

- 34. Which of the following are the three general types of control structures?
 - a. conditional sequence, branching, selection
 - b. simple sequence, selection, repetition
 - c. selection, Repetition, repetition
 - d. simple sequence, branching, decision making

- 35. Which of the following are types of selection control structures?
 - I. One-Way selection
 - II. Two-Way selection
 - III. Multiple-Way selection
 - a. I only
 - b. II only
 - c. I and II only
 - d. II and III only
 - e. I, II and III

Answer: E
Points: 1/1

- 36. A repetition control structure
 - a. always repeats without any condition.
 - b. requires a conditional statement.
 - c. can only be used in combination with a selection control structure.
 - d. is required for repeating program segments 500, or more, times.

Answer: B
Points: 1/1

- 37. Which of the following sentences can be translated into a conditional statement?
 - a. Tomorrow is the start of the second semester.
 - b. If you are a national merit finalist, you will receive a scholarship.
 - c. Your SAT score is 1250.
 - d. Go straight to jail; do not pass go; do not collect any money.

38. What is the output of the following program segment?

double bonus = 500.0; double sales = 200000.0; if (sales >= 300000.0) bonus += 250.0; System.out.println("Bonus: " + bonus); System.out.println("The End");

- a. Bonus: 50.0
 The Endb. Bonus: 500.0
 The End
- Answer: B
 Points: 1/1

c. Bonus: 750.0 The End

d. No output

<u>В</u>

39. What is the output of the following program segment?

a. 2500 2500 c. k = 2500

b. k = 2500k = 2500 d. No output

40. What is the output of the following program segment?

$$\label{eq:k_section} \begin{split} &\text{int } k; \\ &k = 4000; \\ &\text{if } (k < 3000) \\ &\text{System.out.println("k = " + k);} \\ &\text{System.out.println("k = " + k);} \end{split}$$

a. 4000 4000 c. k = 4000

b. k = 4000k = 4000

d. No output

Answer: C **Points:** 1/1

41. What is the output of the following program if **4000** is entered at the keyboard?

Scanner input = new Scanner(System.in);
int k = input.nextInt();
if (k < 3000)</pre>

{
 System.out.println("k = " + k);
 System.out.println("k = " + k);
}

a. 4000 4000 c. k = 4000

b. k = 4000k = 4000

d. No output

42. What is the value of **num** at the conclusion of the following program segment?

- a. 100
- b. 102
- c. 105
- d. 109
- e. Error message

43. Compare the following two program segments. Assume that variables are correctly defined. What is true about the output of these program segments?

Segment 1	Segment 2
Scanner input = new Scanner(System.in);	Scanner input = new Scanner(System.in);
<pre>int k = input.nextInt();</pre>	<pre>int k = input.nextInt();</pre>
if (k == 1)	switch (k)
System.out.println("k equals 1");	{
if (k == 2)	case 1 : System.out.println("k equals 1");
System.out.println("k equals 2");	case 2 : System.out.println("k equals 2");
System.out.println("Wrong Input");	default : System.out.println("Wrong Input");
	}

- a. Segment 1 displays the same output as Segment 2 for all values of k.
- b. Segment 1 never displays the same output as Segment 2.
- c. Segment 1 displays the same output as Segment 2 if k = 1 or k = 2.
- d. Segment 1 displays output. Segment 2 has a syntax error.
- e. Segment 1 and Segment 2 will both display **Wrong Input** regardless of the value of k.

Answer: E **Points:** 1/1

- 44. The **for** loop structure is best used for what kind of Repetition?
 - a. pre-condition
 - b. post-condition
 - c. fixed

C 45. What is the output of the following program segment?

```
int x,y;
y = 0;
for (x = 1; x \le 5; x++)
       y++;
       y++;
System.out.println("y = " + y);
```

```
a. y = 5
b. y = 6
c. y = 10
d. y = 11
e. y = 12
```

Answer: \mathbf{C} **Points:** 1/1

46. What is the output of the following program segment?

for (int k = 5; k > 0; k--) System.out.println("What is OOP?");

- a. What is OOP?
 - What is OOP?
- b. What is OOP?
 - What is OOP?
 - What is OOP?
 - What is OOP?
 - What is OOP?
- c. What is OOP?
 - What is OOP?
 - What is OOP?
 - What is OOP?
- d. What is OOP?
- e. No output

A 47. What is the output of the following program segment?

- a. 25 12 6 3
- b. 25 13 7 4 2
- c. 25 12 6 3 1
- d. 12 6 3 1
- e. 12 6 3

Answer: A
Points: 1/1

48. What is the output of the following program segment?

- a. 25 12 6 3
- b. 25 13 7 4 2
- c. 25 12 6 3 1
- d. 12 6 3 1
- e. 12 6 3

B 49. What is the FIRST number output from the following program segment?

```
int j;
j=5;
while (j>-2)
{
         j-=3;
         System.out.println(j);
}
```

a. 5b. 2

c. -1

d. -2

e. -3

50. What is the output of the following program segment?

- a. 12345678910
- b. 1 2 3 4 5 6 7 8 9 10
- c. 1
 - 2
 - 3 4
 - 5
 - 6
 - 7
 - 8
 - 9
 - 10
- d. 10
- e. 11

Answer: E **Points:** 1/1

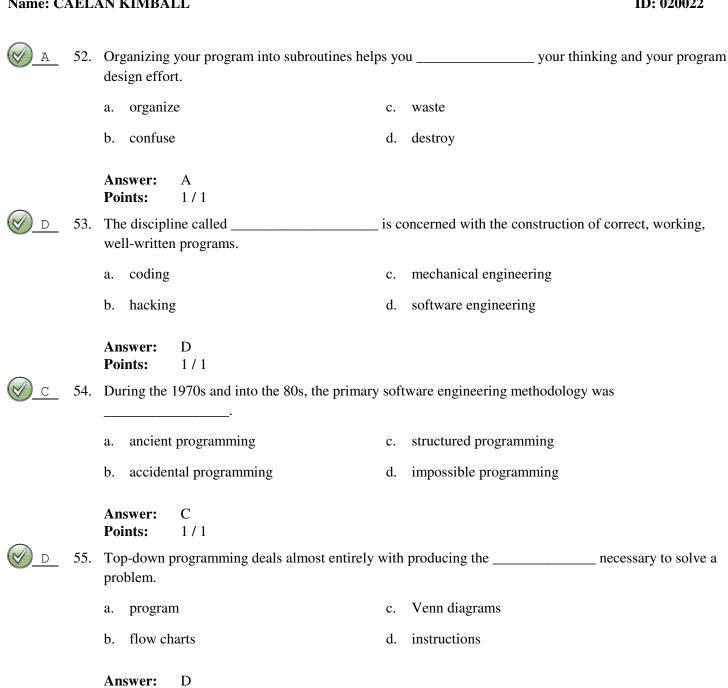

- 51. Large programs are so ______ that it would be almost impossible to write them without some way to break them up into manageable "_____."
 - a. complex, chunks

c. beautiful, pieces

b. simple, bytes

d. simple, chunks

56. On a timesharing system, users sit at "______" where they type commands to the computer.

a. desks c. terminals

b. computers d. cubicles

Answer: \mathbf{C} **Points:** 1/1

1/1

Points:

57. One set of Java GUI components is the AWT or _______, which was available in the original version of Java.

- a. Awesome Wonderful Twitter
- c. Aardvarks, Wombats, and Turkeys
- b. Abstract Windowing Toolkit
- d. Advanced Windows Tools

Answer: B
Points: 1/1

- 58. Another set of GUI components included since Java version 1.2, is known as _____
 - a. dance

c. swing

b. stuff

d. Super Windowing Toolkit

Answer: C
Points: 1/1

- 59. Java includes many predefined classes that represent various types of GUI ______.
 - a. devices

c. windows

b. components

d. programs

Answer: B
Points: 1/1

- 60. One of the most basic protocols on the Internet is the _____ (IP), which specifies how data is to be physically transmitted from one computer to another.
 - a. International Pancake

c. Network Protocol

b. Routing Table

d. Internet Protocol

Answer: D **Points:** 1/1

- 61. The two most important basic Internet protocols are referred to collectively as _____ and provide a foundation for communication.
 - a. TCP/IP

c. DoD

b. TCBY

d. TTBIP

- 62. All communication over the Internet is sent in the form of ______.
 - a. boxes

c. envelopes

b. packets

d. cell phones

Answer: B
Points: 1/1

- 63. Every computer on the Internet has an _______, a number that identifies it uniquely among all the computers on the net.
 - a. SSN

c. phone number

b. IP address

d. ID code

Answer: B
Points: 1/1

- 64. ______, are used to fetch messages from an email account so that the recipient can read them.
 - a. Fetch and Execute

c. Line and Lure

b. POP and IMAP

d. Postmen

Answer: B
Points: 1/1

- 65. The statement x = x * 27; could also be written as:
 - a. x * 27 = x;
 - b. x += 27;
 - c. x *= 27;
 - d. x * x = 27;

Answer: C **Points:** 1/1

- 66. In programming, what is a cast?
 - a. A cast is an explicit type conversion.
 - b. An an old social system in India
 - c. A group of people working together to create a dramatic work.
 - d. A set of characters enclosed by double quotes.

- 67. By default, what is the type of the literal 3.14?
 - a. char
 - b. int
 - c. float
 - d. double

Answer: D
Points: 1/1

- 68. The boolean (bool) type gets its name from a mathemetician named,
 - a. Rick Perry.
 - b. Stewart White.
 - c. George Boole.
 - d. Booley Boolenov.

Answer: C
Points: 1/1

- 69. The general form for initializing a variable is:
 - a. x = x + 1;
 - b. var < 5;
 - c. type var = value;
 - d. cout << "initializing a variable";

Answer: C **Points:** 1/1

- 70. Which real number data type is the most accurate?
 - a. double d. long
 - b. float e. scientific
 - c. real

Answer: A Points: 1/1

- 71. Unary operators can be written in _____ style.
 - I. prefix
 - II. postfix
 - III. infix
 - a. I only

d. I and II only

b. II only

e. I, II and III

c. III only

72. Assume the variables \mathbf{a} , \mathbf{b} , and \mathbf{q} are defined as \mathbf{int} .

Which Java statement below represents the mathematical expression q = 6(a - b)?

a. q = 6 * a - b;

c. q = 6a - 6b;

b. q = 6 * (a - b);

d. None of the above

Answer: B
Points: 1/1

73. What is the output of the program segment below?

int number = 5 + 8 * 3 + 2; System.out.println(number);

a. 31

d. 65

b. 41

e. Error message

c. 45

Answer: A
Points: 1/1

74. What is the output of the program segment below?

int number = (5 + 8) * 3 + 2; System.out.println(number);

a. 31

d. 65

b. 41

e. Error message

- c. 45
- Answer: B
 Points: 1/1

- 75. What are the three data types that we are able to input from the keyboard?
 - a. int, data, server

d. String, int, double

b. String, document, file

e. None of these

- c. picture, text, file
- **Answer:** D **Points:** 1 / 1

76. In the following code, assume that the portion designated with **<#1>** is a *true* statement. What will be the output?

a. Elvis

d. Presley (has a leading space)

b. ElvisPresley

e. None of these

c. Elvis Presley

Answer: C
Points: 1/1

77. How many elements are stored in *double d[]*? Store the answer in an appropriate variable type.

a. int i = d.length();

d. More than one of these

b. int i = d.length;

e. None of these

c. int i = (double)d.length;

Answer: B **Points:** 1/1

MATCHING

Is this one of the eight basic (primitive) Java data types?

- a. yes, it is a basic data type
- b. no, it is not a basic data type

78. double

Answer: A
Points: 1/1

79. boolean

Answer: A **Points:** 1 / 1

80. short

Answer: A Points: 1/1

81. check

82. byte

Answer: A Points: 1/1

What kind of operator is this?

- a. Boolean Operator
- b. Relational Operator
- c. Arithmetic Operator
- d. Assignment Operator
- e. Conditional Operator

83. *

Answer: C

Points: 1 / 1

84. &&

Answer: A
Points: 1/1

Answer: A
Points: 1/1

В 86. ==

Answer: B
Points: 1/1

В 87. !=

Match the escape sequence code with the correct meaning.

- a. \b
- b. \f
- c. \n
- d. \r
- e. \t
- f. \"
- g. \'

88. Backspace

Answer: A

Points: 1 / 1

B 89. Form feed

Answer: B
Points: 1/1

E 90. Horizontal tab
